- Fixed purchase price with no hire costs makes budgeting straightforward.

#### Options:

- Additional foot pump, hose and taps available separately.

The 1000 litre Aqube is a convenient, economical and recyclable drinking water supply ideally suited to sites and events that require a one-off delivery of quality assured wholesome drinking water.

The pallet base, cardboard packaging and plastic liner are all fully recyclable; after the water inside has been used, simply break down the container and recycle locally.

Aqube can be delivered anywhere in mainland UK at one competitive price with just 48 hours notice, and is available with a range of couplings and attachments. Each Aqube comes with a versatile tap suitable for push-on and 'hozelock' fittings included.
