

10,000 Ltr Rigid Tankers

Our 10,000 litre Rigid Water Tankers are light, compact and highly manoeuvrable making them ideal for Bulk water deliveries in areas where space is restricted.

As they are 18 tonne vehicles, they are also able to make deliveries on the Restricted Road Networks in central London at all hours of the day or night. Handy for City centre emergencies.

Equipped with variable speed Hygienic stainless steel pumps and pipe work, these tankers can pump water at up to 920 litres per minute!

We also only use DWI approved delivery hoses so you can be assured of a quality delivery each and every time.

Tanker specifications

Capacity (ltrs)	10,000
Vehicle weight (tonnes)	18
Length (m)	7.3
