

## 30,000 Ltr Articulated Tankers

Our 30,000 litre Articulated Water Tankers are the largest on our fleet and are used where bulk volumes are required quickly and in one hit.

Using tankers such as these we have successfully delivered projects requiring over a million litres of water within 24 hours!

At 44 tonnes however, these vehicles are not always suitable for smaller sites – please see our options for 10,000 or 15,000 litre tankers in those instances.

Also utilising variable speed, high volume discharge pumps, these tankers can discharge 30,000 litres in as little as 35 minutes.

## Tanker specifications

Capacity (ltrs)	30,000
Vehicle weight (tonnes)	44
Length (m)	15.4
Width (m)	2.5
Height (m)	3.9
Turning circle (m)	25-30

2" Instantaneous/BSP.

Discharge time at 0m head (hydraulic pump) - 35 mins - up to 7 bar pump pressure.

Complies fully with UK water regulations.
