Job Title: Field Technician (Water Tanker Driver)

Job Type: Day Shift Field Technician, in attendance at Earls Colne depot 4 days at a time.

Location: Earls Colne Depot, CO6 2NS

Employment Type: Permanent Full Time

Salary: £26,117 base salary, with opportunities of additional earning dependant on level of activity and overtime.

Mon-Fri 8.5hr Shifts are based at Standard Rate of Pay, O/T payable after 8.5hrs worked

Saturday 8.5hr Shifts are based at 1.5x Standard Rate of Pay throughout

Sunday 8.5hr Shifts are based at 2x Standard Rate of Pay throughout

If you offer or are asked to work on any additional days outside of your '4on', then these days/hours will be paid on the same basis as the above.

Requirements: C+E Licence, Digital Drivers Card and current Drivers CPC accreditation.

Role Overview:

As an overview, Water Direct provide safe, wholesome drinking water wherever, whenever a piped supply is unavailable, unusable or inadequate. Primarily our work is in supporting the Water Utilities when they have a mains supply issue, keeping the general public on supply by using our tankers and other alternative means.

We also work for the Commercial and Private sectors supplying the construction, festival, petrochemical and other industries with water in bulk. As part of this, we provide Contingency Water Supplies too, to keep businesses running throughout Utility outages; all 24/7/365.

Following an initial training period working alongside existing drivers who will provide guidance, and evidencing you are capable of undertaking your duties without direct supervision, you will advance to working independently on your 4on/4off shift pattern.

Due to the nature of the product we are supplying, and the fact it is intended for human consumption; our Quality Systems are very stringent and applicants would be required to undertake a level of internal training and show understanding of the importance of what we do. Field Technicians are responsible for safely abstracting water from the mains networks, ensuring minimal risk of contamination, and transporting and delivering it in the same manner.
