

wherever and whenever you need it

## Technical Specifications Bottled Water Handout Pods

Handout Stations for bottled water.

Bottled Water Handout Pods are a safe, efficient way to distribute water quickly to those who need it in an emergency or to provide a rapid response at the outset of a water loss incident.

Bottled Water is supplied by the pallet, in 330ml, 500ml, and 2 litre bottles. Pods can be set up in a variety of locations including car parks, and can be configured for use by pedestrians, or set up as socially distanced drive through handout stations.

Each pod contains all the necessary PPE, signage, and customer advice required to set up a safe, compliant water handout location.

### Also Available:
